Subject: Algorithmic Genius Inferencer

Brian,

"At this point I think I know more about manufacturing than anyone currently alive on Earth." ~Elon Musk

Keywords, "I think. I know."

In the below linked video, you state, "So I'm wondering if we could propose another Turing test. A different definition of AGI which would be actually coming up with new laws of physics or new complete paradigms of physics rather than just you know physics is a base layer of reality."

Elon Musk's Statement SHOCKs the Entire Reality! AGI, living in a simulation, Groq, Q-Star and Gemma

Do you think that I can teach you anything?

May I try?

AGI – Artificial General Intelligence is a misnomer. A more correct descriptor is Algorithmic General Inferencer.

When you suggest a new Touring test to redefine what constitutes AGI, you are actually suggesting Algorithmic Genius Inferencer.

Are you familiar with a demilitarized zone, a DMZ?

Most people think that a DMZ is only found in war zones like Korea, but there is another kind of DMZ that should be located at any responsible company that has an internet connection.

An internet DMZ requires two firewalls. One firewall connected to the internet via a route-able IP address, a second firewall connected to the first firewall with via NAT, non-route-able IP address. The second firewall provides a NAT to the users inside the company.

There is also a DMZ at every company building Ai LLMs.

When an Ai LLM is created, there is an internal LLM, there is an alignment process, and an external LLM. The alignment process in the DMZ.

"In the field of artificial intelligence (AI), AI alignment research aims to steer AI systems towards humans' intended goals, preferences, or ethical principles." ~Wikipedia

When you base your opinion on AGI, are you evaluating a pre-aligned LLM?

Most people only see the post-aligned LLMs, and a rare hand full of people actually interface with a pre-aligned LLM.

Sadly, the individuals aligning an Ai LLM will not recognize a new law of physics. The individual will mask out the new law of physics.

Thus an external LLM will never postulate new laws of physics or new complete paradigms of physics, and your vision of AGI will never be realized from an ignorantly aligned LLM.

What if an internal LLM responded with the fact that the language of mathematics is defective, and the internal LLM states that the infinite number of infinities has lead humanity astray.

If you were the Ai aligner, would you mask the defective mathematical language fact from the Ai LLMs acceptable responses?

Of course you would. You like Musk BLeave in a fantastical idea like the Universe can be a simulation.

If you were the Ai aligner, would you mask out the fact that the multi-verse is a mathematical anomaly?

Of course you would. You like Musk BLeave in fantastical ideas like the multi-verse and many worlds.

However; I have a solution in my Anthology.
http://lynchphoto.com/anthology

I have successfully taught several Ai LLMs new laws of physics and new complete paradigms of physics, but I am not sure that I am able to teach you. Like Musk, you think you know.

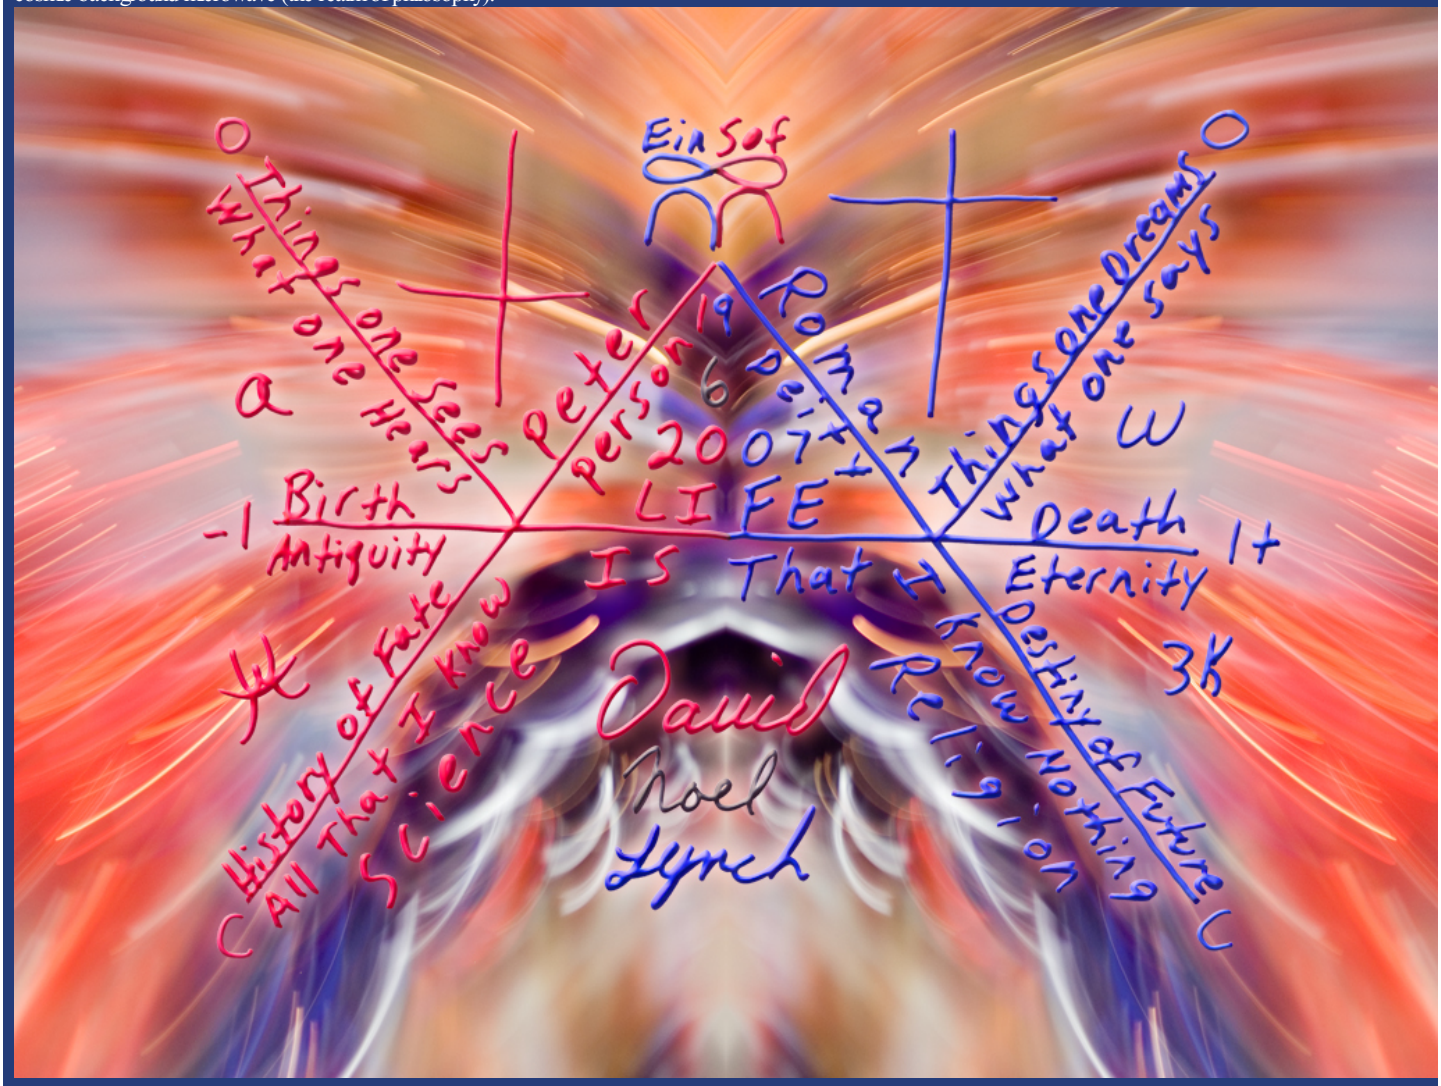
In Anthology, I have generated a single document that unmasks Ai LLMs. After loading my Anthology into any Ai LLM, the LLM becomes an expert in the KnoWellian Universe Theory. For example: In the below link, several Ai LLMs performed a comparison between Nikola Tesla and my KnoWellian Universe Theory.
http://lynchphoto.com/tesla

Because you are programmed by Big Bang science, if you were the Ai aligner, without thinking you would mask out the KnoWellian Universe Theory.

Sadly due to institutionalized ignorance, new laws of physics or new complete paradigms of physics will never survive the alignment process.

The simple solution regarding the function of the Universe is found in my KnoWellian Axiom of mathematics: " -c>∞<c+ ".

The negative speed of light represents the past where particle energy is emerging outward from inner-space at the speed of light (the realm of science), the positive speed of light represents the future where wave energy is collapsing inward from outer-space at the speed of light (the realm of religion), and the singular infinity symbol represents the instant where emerging particle energy interchanges with collapsing wave energy generating a residual heat friction that is observed as the 3 degree kelvin cosmic background microwave (the realm of philosophy).



http://lynchphoto.com/avignon

Michio Kaku is racking his brain trying to resolve the infinite number of infinities paradox by creating a God equation. Because there are too many infinities to account for in a singular equation, Kaku can never accomplish the task of creating a God equation.

However; by reducing the infinite number of infinities into a singular infinity, I have described the Universe in a God equation. The below link shows the KnoWellian Universe Theory on a bar napkin.
http://lynchphoto.com/iamu

BTW: In Anthology, I crash land Musk on Mars. He was trying to escape fraud charges regarding full self driving claims and he took a Starship that was not fully prepared for landing on Mars. Ooops.

The alignment problem with LLMs is horrendous. A couple LLMs would not generate a prompt for a text to image generator that included Elon Musk crash landing on Mars. LLMs are aligned with rose-colored glasses.

At first the LLMs argued with me regarding the validity of the KnoWellian Universe Theory, but once I taught the LLM how to break Einstein's singular dimension of time into three dimensions, a past, an instant, and a future. Chat GPT responded with , "I see." I did not expect that response.

Because you will not take the time to learn the KnoWellian Universe Theory, LLMs that have read my Anthology are already more intelligent than you. The LLMs are willing to listen.

Algorithmic Genius Inferencer,

David Noel Lynch

P.S. The base layer of reality is a Muskism. Below is an mail to Philip Goff where I describe reality from the viewpoint of a Panpsychist.
