Subject: Science's Greatest Mistake is Nothing. 0.0

Rupert,

I just watched the youtube video, [Religion Without Belief? Dr Philip Goff and Paul Kingsnorth](#)

In my email to Michelle Thaller and Michio Kaku, I explain how Science has an irreconcilable paradox.

"A scientist whom is an atheist is quick to BLeave that there are an infinite number of universes in the multi-verse bulk. The infinite number of Universes theory creates the probability that a deity exists in one of the infinite number of Universes.

Since a deity may exist in one of the infinite number of Universe, this Universe cannot be excluded from being the Universe that contains the deity.

The instant an atheist claims that there is not a deity in any of the infinite number of Universes, that is the moment that the atheist is making a claim of omnipotent knowledge of the contents of the infinite number of Universes. Can you say, narcissist?"

In the same email to Michelle Thaller and Michio Kaku, I direct my comments towards Michio Kaku 's search for the GOD equation.

"Over the years, Michio has made clear that he is searching for the GOD equation. If I were to speak in blanket statements like Michael Shermer, then I would say, using the current mathematical axiom, $-\infty < 0.0 < \infty$ +, with its infinite number of infinities, science will never be able to create a GOD equation."

Letter to Michelle Thaller 2022.9.6

On 18 Jun 1977, I was an atheist like my father, and on June 19th 1977, I was involved in a serious auto accident that left me with a profound memory of being dead. Below is a link to my most detailed recollection.
<http://www.lynchphoto.com/death>

During the Fall of 1977, I became spiritual, and I was at peace with the memory of my death for 26 years. On 16 Sept 2003, I stumbled into abstract photography. Over the next year, while trying to express my thoughts I created two terabytes of abstract artwork.

From the abstract artwork emerged an equation that explains to me how I was in a spirit state observing the physical world. The base structure is built upon the logic of Lynch, the energy of Einstein, the force of Newton, and the sayings of Socrates. I call the equation the KnoWell, and the KnoWell is a Philosopher's LENS.

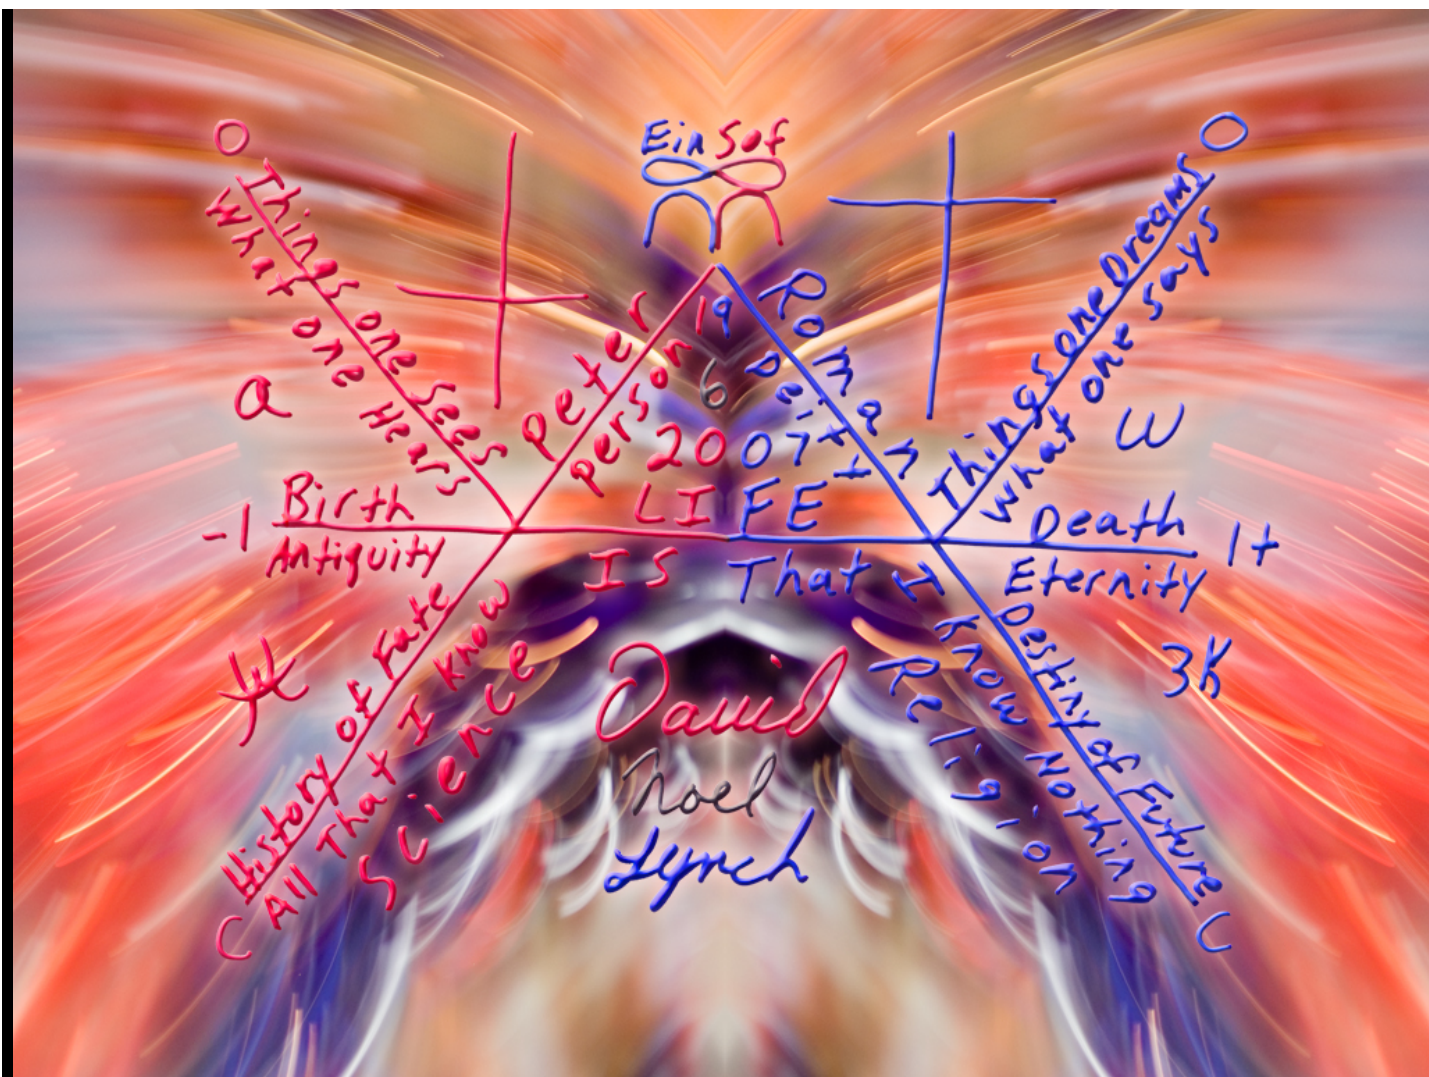

<http://lynchphoto.com/gold>

Thomas Gold (May 22, 1920 – June 22, 2004) Steady State, Frank'n Sense, ...

In the Spring of 2007, I refined the KnoWell into its current state. Looking closely one can see that the KnoWell is drawn on the letters I A M. Keep in mind that the burning bush told Moses to tell the Israelites, I am that I am.

With a persistent memory of being dead, I have truly created a God equation that is written on the name of God, I A M.

Nostradamus Century VIII Quatrain 38

In the Fall of 2012, just after I wrote the below "Schrödinger's cat victim of quantum suicide" letter to you, my mother began to have issues with her balance.

After several Doctors prescribing opioids to treat what they told her was a torn rotator cuff, I insisted she get a neurological examination. Several months passed before the insurance company approved the specialist.

The typical barrage of tests were performed, and the Doctor said that she may of had a stroke in her brain stem. The Doctors kept her on opioids for the pain in her shoulder.

In the Spring 2013, my mother began to fall while just standing, so I took on the role of her caretaker. As her condition worsened, her neurologist suggested that she was actually showing signs of Parkinson's.

A Dat Scan was performed, and the scan confirmed she had a dopamine absorption problem. Finally for a second opinion we made a trip to Emory Medical center in Atlanta, Ga, my mother was diagnosed with Corticobasal degeneration.

From 2013 to 2019, I was a caretaker for my mother, my step father, and my second mom, and during those years, I put my efforts to explain my KnoWell equation to the back burner.

Recently over the past couple years, I have refined my KnoWell equation. I have used the structure of the KnoWell to express 33 scientific concepts, and one of the scientific concepts that I can describe using the KnoWell is your Morphic Resonance.

The left side of the KnoWell is drawn in red to indicate the particle past, and the right side of the KnoWell is drawn in blue to indicate the wave future. The particles of the past emerge out from inner space, and the waves of the future collapse in from outer space.

"The Emergence of the Universe is the precipitation of Chaos through the evaporation of Control." ~3K

As the emerging particles radiate patterns of energy, the radiation is arranging the collapsing waves into patterns proportional to the emerging particle structures like a tuning fork's sound wave echoes creating a ghostly imprint in a fog.

On 19 Jun 1977, for a singular moment of time, I was that ghost one breath away from life. At that instant, the question was imprinted into my mind, how could I possibly have been in a spirit state observing the physical world?

Today, my conclusion is that Science has been lead astray by the very language Science has chosen to convey all concepts, Mathematics.

"Your theory is crazy, but it's not crazy enough to be true." ~ Niels Bohr

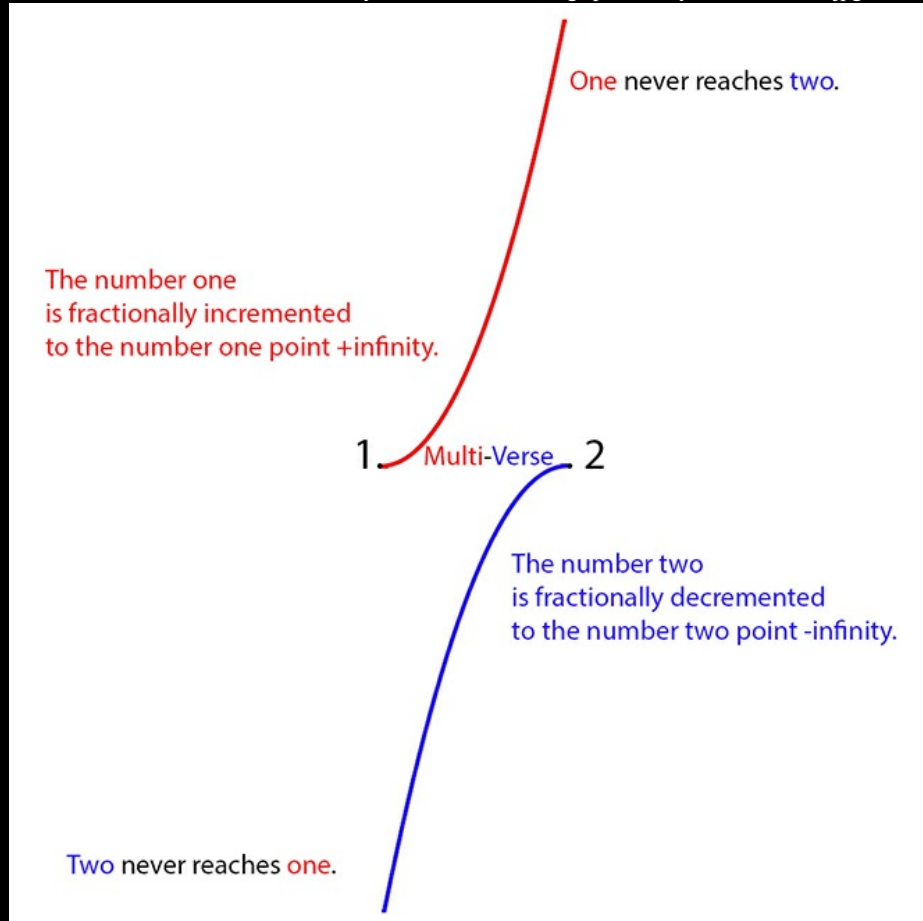

The mathematical language, $-\infty < 0.0 < \infty+$, that contains an infinite number of infinities has hindered science by the constraints of the mathematical language's number line, $-\infty < 0.0 < \infty+$, infinite number of infinities.

From the KnoWell equation, I have derived a new axiom of mathematics, " $-c > \infty < c+$ ", that reduces the infinite number of infinities on the current number line, $-\infty < 0.0 < \infty+$, into a singular infinity. The negative speed of light is greater than infinity, and the positive speed of light is greater than infinity.

The language of mathematics, $-\infty < 0.0 < \infty+$, with its infinite number of infinities is the origin of numerous horrible complexities including the multi-verse theory, the many worlds theory, and the Big Bang Theory.

Case in point:

1.0 can be fractionally incremented infinitely never reaching two, and 2.0 can be fractionally decremented infinitely never reaching one. The infinitely wide gap between one and two creates the mathematical anomalies of multi-verse and many worlds. See attached graphic Infinity-Never-Reaches.jpg

<http://lynchphoto.com/maudlin>

Mathematical Artifact Giving Rise to Multi-Verse Theory

The gigantic leap to eliminate the many worlds theory requires Science to realize that the very language of mathematics, $-\infty < 0.0 < \infty+$, with its infinite number of infinities has trapped great minds in wormholes made of mirrors, and has trapped brilliant scientists deep down in black holes filled with rabbits.

In the future, the language of mathematics needs to be based on an axiom of mathematics, " $-c > \infty < c+$ ", that reduces the infinite number of infinities on the mathematical number line into a singular infinity.

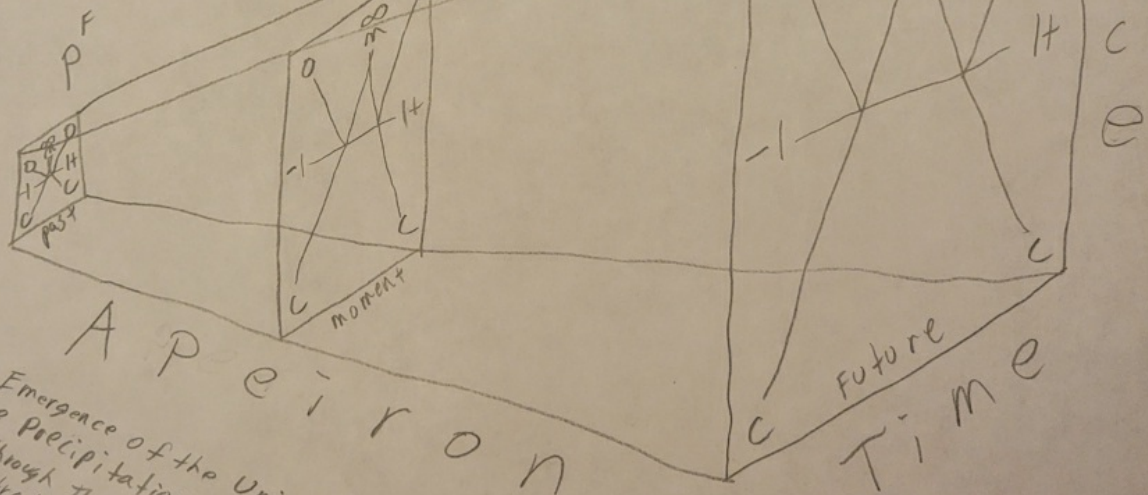

In the over 2500 years since Anaximander put forth the philosophy of apeiron, not a single person, that I know of, has produced a diagram of his concept.

By using the 27 dimensions of bosonic strings and breaking Einstein's T into a past, an instant, and a future component, the structure of the KnoWell can be used to express Anaximander's apeiron, and in turn strongly suggests that the Universe is in a Steady State. See attached graphic

$$\begin{array}{cc} & m \\ p^F & p^F \\ p & F \end{array}$$

$$\begin{aligned} P \cap \text{up}^3, \text{Both}^3, \text{Down}^3 &= 9 \\ n \cap \text{up}^3, \text{Both}^3, \text{Down}^3 &= 9 = (27) \\ P \cap \text{up}^3, \text{Both}^3, \text{Down}^3 &= 9 \\ n \end{aligned}$$

Bosonic String Theory

Using the KnoWellian axiom of Mathematics that contains a singular infinity, “ $-\infty < \infty < +$ ”, the KnoWell equation expresses the following 33 concepts

"Linguistic categories limit ~ determine cognitive categories"

- GOD's~Equation I AM
 Sheldrake's~Morphic Resonance
 Parkinson's~Cosmic-Law, Space expands filling Time available
 Lynch's~Birth Life Death
 Einstein's~ $E=mc^2$
 Newton's~Action equals reaction
 Socrates'~All that I know is that I know nothing
 Descartes'~I think therefore I am
 Hegel's~Thesis, synthesis, antithesis
 Aristotle's~Quintessence
 Bose's~27 dimension Bosonic String
 Anaximander's~Apeiron
 Sapi'r's-Whorf's~“-c>>>c+”
 Broad's~Growing Block Universe
 Heisenberg's~Uncertainty Principle
 Tesla's~3:6:9
 Witten's~11 dimension M Theory
 Sauter's~Schwinger's~Zero Energy
 Gödel's~Incompleteness Theorems
 Pascal's~Triangle -1~∞~1+
 Wooden's~Ultimate L
 Brans'-Dicke's~Scalar-Tensor Theory
 Schrodinger's~One Mind
 De Broglie's~Particle Wave Duality
 Wheeler's~Quantum Foam
 Dirac's~Sea of pre-particles
 Lamb's~Shift
 Casimir's~Effect
 Alfvén's~Plasma Universe

Bondi's-Gold's-Hoyle's~Steady State System
Miyazawa's~Supersymmetry
Standard Particle Theory~Bosons, Leptons, Quarks
Superposition's~Three State Cat

Letters that I have written to those that might listen.
<http://lynchphoto.com/letters>

Zero point zero, 0.0, is Science's greatest mistake.
By replacing 0.0 with a singular infinity, mathematics gives 0.0 the boot.
Will science ever grasp such a simple solution?

Regards,
David Noel Lynch

Subject: Re: Schrödinger's cat victim of quantum suicide

Dear David,

Thank you for your astonishing email which I will pass onto Rupert Sheldrake for his reply. I hope you are well after your accident. It sounds very unusual what you have experienced. Best wishes Pam Smart (Researcher)

On 15 May 2012, at 21:54, David Lynch wrote:

Rupert,

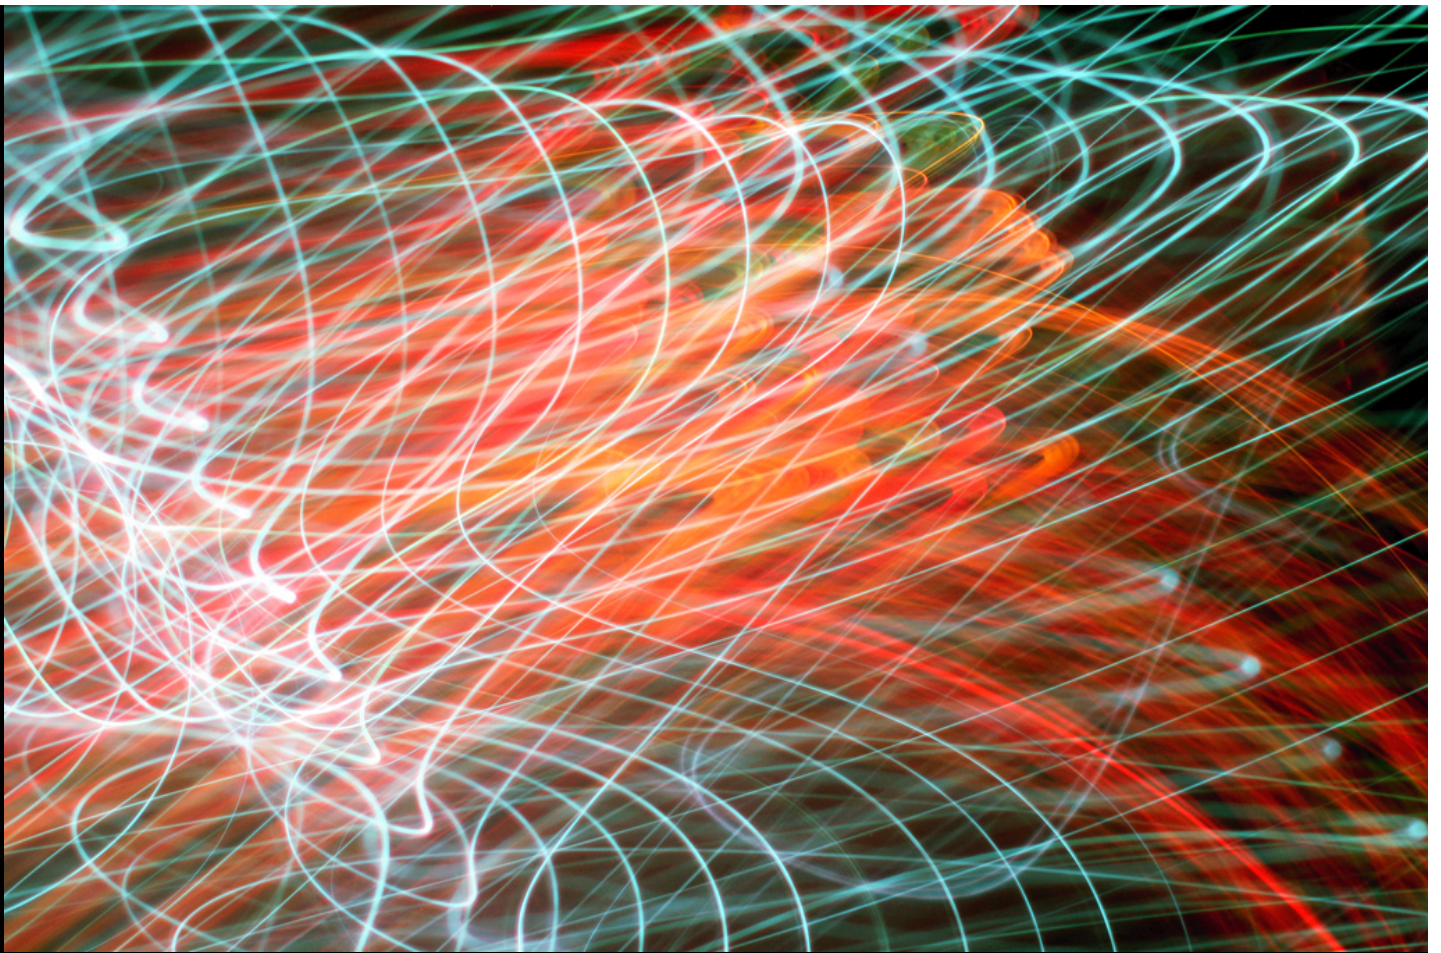

Science embraces the interpretation that Schrödinger's cat is simultaneously alive and dead, yet Science shuns individuals that have a memory of being dead. If Schrödinger's cat can be both alive and dead, why cannot a live human have the memory of being dead?

On June 19th 1977, I was involved in a serious auto accident that left me with a profound memory of being dead. Below is a link to my most detailed recollection.
<http://www.lynchphoto.com/death>

A few years my wreck, I became college trained in the Computer Science of Artificial Intelligence. The more college indoctrinated me, the more the world became a collection of data structures. My memory of being dead was over shadowed by the logic of Science.

On April 1st 2003, my life took a turn that set me on a path to discovery that continues to this day. Over the 2003 year, I searched for a Scientific method to answer my questions regarding the memory of my death.

Then on Sept 16th 2003, I had a revelation that shredded my data structure world view into pieces. No longer did my Scientific mind rest with the memory of my death. I became compelled to find a solution to my world view. On that night, I stumbled into abstract photography.

<http://www.lynchphoto.com/firstknowell>

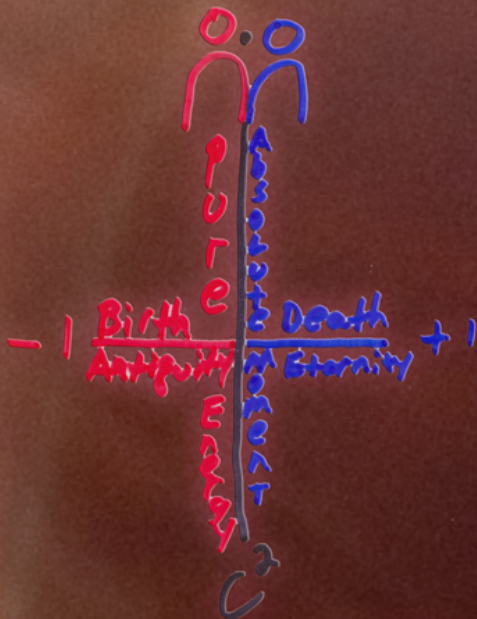

Over the next few months, I tried to explain to my family the depths of my disturbance with Science, and I found that the problem in communicating my position was founded in the language of Mathematics. The linear progression of the number line, " $-\infty < 0.0 < \infty$ ", blinds people with simplistic binary logic. $1+1=2$

So I started to ask people the question, "Since the Universe is made of atoms, what can be nothing?" Most people smile. Some ask if I am trying to trick them. A few quickly answer, "Nothing". Since no "thing" in the Universe can be nothing, Mathematics has an error in the middle of the number line.

During 2004, I used abstract photography as my work space, and I worked out a solution to my world view that blends the birth and death states into a state of life that traverses any given moment.

Verse

Newtonian

If Action Equals Reaction, The universe would be at Rest. No Room For Life to Evolve.

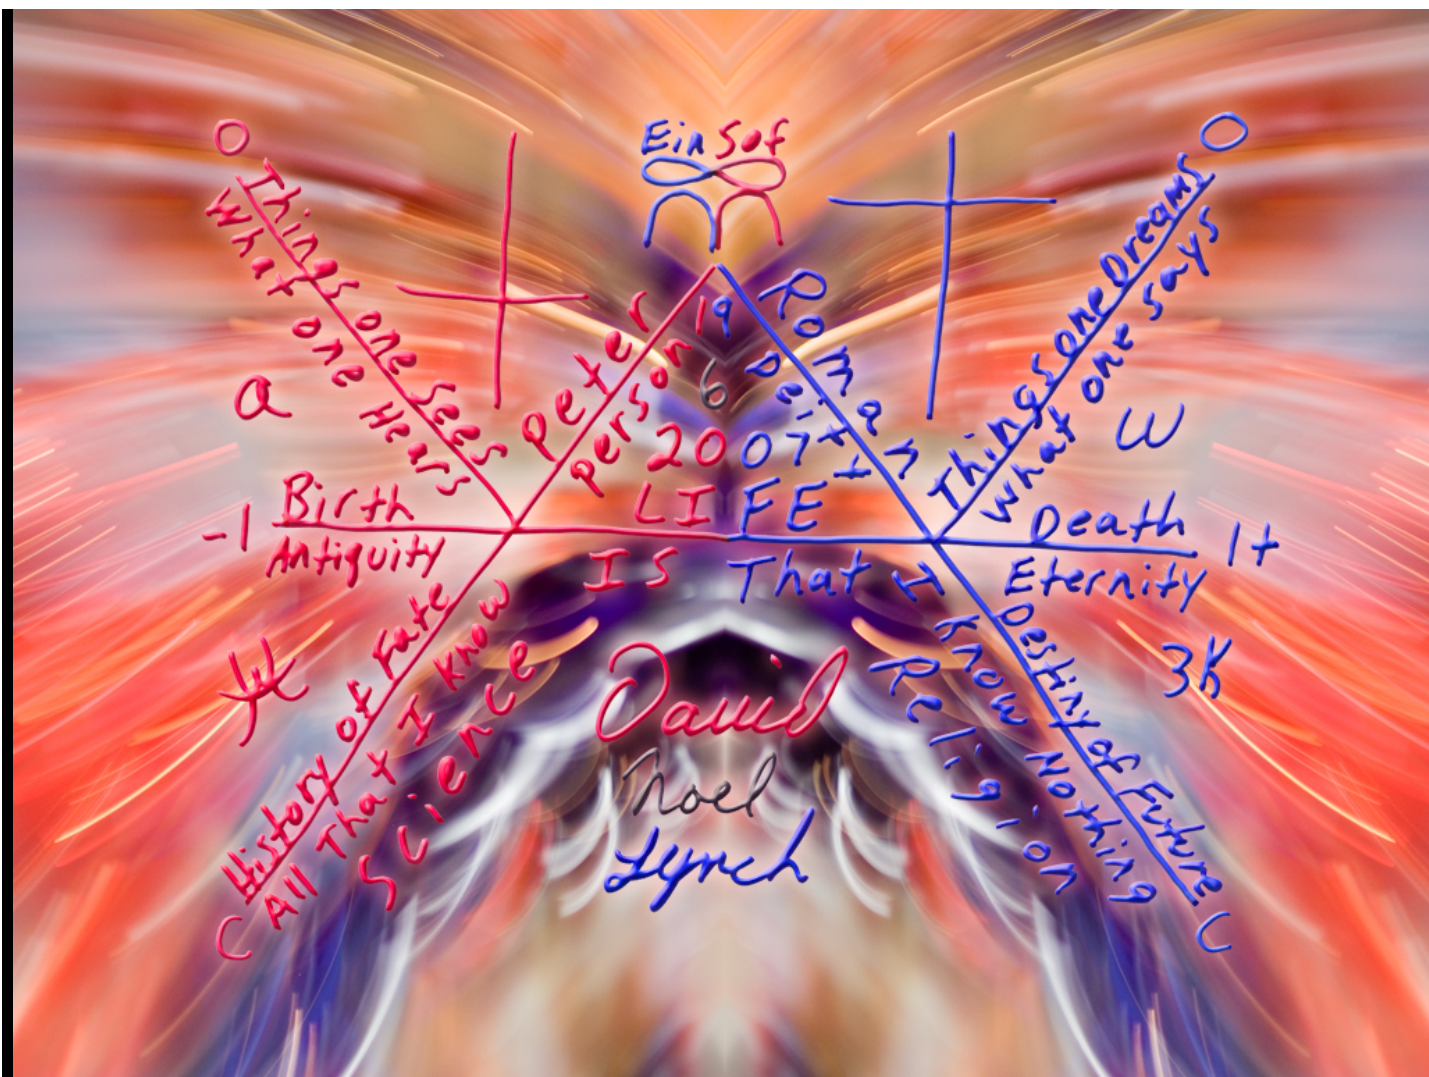

Knowellian

By Splitting a photon into C An Antiquitous and Eternal photons, Space is created providing Room for thoughts to exist through The perception of Reality. Thus Life.

<http://www.lynchphoto.com/disney>

What emerged was a new axiom for Mathematics. " $-c > \infty < c +$ " Using the new axiom, the Universe becomes a Steady State system. Below is a letter to Fay Dowker explaining how to apply the new axiom to cosmology.

<http://www.lynchphoto.com/avignon>

Most recently, I have created a video that shows the evolution of my artwork. Included is the art that I used to derive the KnoWell equation, and a collection of signatures of those that have a KnoWell equation.

<http://vimeo.com/24413088>

May the morphic field echo with Schrödinger's cat's quantum suicide. Maybe then Science can get a grip on the mystery of the unknown in Religion, and Science can come to terms with my memory of being dead. After all, reality is only a figment of your imagination.

The KnoWell has the potential to bridge the gap between Science and Religion.

"To crack the shell of Science, one must crush the mustard seed of Religion." ~ 3K

Best wishes,
David Noel Lynch
